1/2-Day Workshop

GLADYS McCOY Empowering the Person You Truly Are and Meeting the Spectacular You

My colleague Elizabeth Weedn and I will work with energy – seeing it, using it and its practical application in our everyday life. We will work with dowsing to remove negative energies and bring positive energies into our lives, our homes and businesses. You will learn how important our words are in all that we do, and how to block the unconscious programming that may come into or be in our beings. We will cover clearing non-beneficial programs from our subconscious and replacing them with beneficial programs (yes, it is self-hypnosis). We will be working with “Unconditional Love Therapy” to send healing out to others and for self-healing. This is a fun, informative class in which you will be doing the work as we teach. Bring a notebook, pen and pendulum to class. There will be plenty of handouts.

1/2-Day Workshop

Dr. CHA~ZAY Dowsing for Confidence and Self Esteem

What does confidence have to do with living a successful life? Are some people naturally endowed with high levels of confidence? We will define and clear lack of confidence and low self-esteem while creating a new game plan for rock-solid confidence and unshakeable self-esteem. Learn practical steps to create increased harmony, success, confidence and self-esteem. We will also examine our personal support system and create the space for a renewed and beneficial system to support our lives. This workshop is interactive and consists of handouts, worksheets, group work and the application of pendulums.

AFTERNOON HALF-day workshops 2:00 – 5:00 p.m.

Given any subject – career, relationships, personal growth, financial affairs, etc. – the path to a greater sense of purpose and joy starts with knowing what you truly *want*. Join Jean Slatter as she shares the breakthrough process called Wantology. Wantology will help you gain the clarity you need to discover what you *really want* and end the confusion. 1/2-Day Workshop

PETER FAIRFIELD The Experience of DEEP HAPPY

There is a place inside of each of us that is always in resonance with our selves and our living universe. This is the place of Deep Happy. In this workshop, we will begin to find and identify this place using specific practices and processes developed and adapted by Peter Fairfield. We will also begin to discover the places within each of us that, with the best of intentions, resist this sacred and biologically imperative union, and through a wonderfully easy process, dissolve and open them. As time permits, Peter, a medical intuitive, will personally work with volunteers and also demonstrate dowsing techniques to facilitate the process.
